Confirm and fill the collection days for your district.

City of Kamakura

Rules and Notices on Disposing Recyclable Items and Garbage

① Sorting

Recyclable items or waste not sorted cannot be accepted. The person responsible for the rejected waste is required to take it back and be sure to sort the waste before putting it out on the next collection day.

Unsorted waste will be affixed with a rejection sticker.

② Types of collection bag

Be sure to put combustible waste and non-combustible waste in a pay bag (designated collection bag), respectively. (From April 1, 2015)

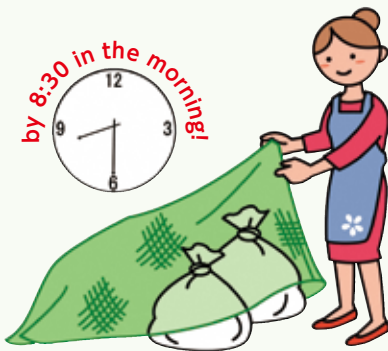

Any waste which is not put in the pay bags (designated collection bags) cannot be accepted in all fairness. Other items, except paper, food and beverage cans and bottles, which are put in transparent or semi-transparent bags (up to 45L) or plastic bags from stores can be accepted.

※The picture shows a 10L (M) bag.

③ Take out time of waste

Be sure to take waste out to a clean station by 8:30 in the morning on collection days. Any waste taken out after the collection is done will not be collected.

④ Waste amount (per household)

Up to 5 bags (transparent or semi-transparent bags up to 45L) or 5 bundles of recyclable items or waste are acceptable at a time for one household's output (or 5 pay bags (designated collection bag) of 40L).

Large amounts of garbage generated from moving or big cleanups cannot be taken out to a clean station. (See page 19 for garbage from moving or big cleanups.)

Large amounts of garbage taken out at a time may block up a passage or exceed the collection capacity. Your cooperation in scheduling disposal of reasonable amount is appreciated.

⑤ Take out to predefined clean station.

Clean stations are to be managed and maintained by the people who use it. Do not take your garbage out to any clean station other than the predefined station for your district. (If you don't know the right place, conform it with your neighbors, real estate agent or landlord.) Put a protective net over the whole waste placed at a station to prevent it from being scavenged by crows.

⑥ Waste from businesses are not accepted

Wastes generated from business activities are not to be brought to clean stations.

Wastes taken out against the rule will be left at the clean station and it will spoil a town sight and annoy people in the neighborhood. The person responsible for such waste is required to take it back.

Pay Bag (Designated Collection Bag) for Household Waste

Waste to be put in pay bags (designated collection bag)

Combustible waste

Non-combustible waste

- ※ They are not accepted when put in other bags.
- ※ If a pay bag (designated collection bag) is torn, fix it with tape or other means.
- ※ Combustible waste and non-combustible waste must be put in separate bags.

Size and price of bag

Size	A set of 10 pieces	Price per piece
5L (S) (42 cm in length x 18 cm in width)	100 yen	10 yen
10L (M) (50cm in length x 26 cm in width)	200 yen	20 yen
20L (L) (60 cm in length x 34 cm in width)	400 yen	40 yen
40L (LL) (75 cm in length x 45 cm in width)	800 yen	80 yen

Width

※Bags are available in sets (10 bags/set). Prices with tax included.

※They are gusseted bags. The gusset is 6 to 10 cm in width.

Waste not put in pay bags (designated collection bag)

[Can be put in transparent or semi-transparent bags up to 45L (including plastic bags from stores)]

① Recyclable items (except some items)

- Plastic containers and packaging
- PET bottles
- Fabrics
- Yard trimmings
- Toxic/hazardous waste
- Plastic goods
- ※Paper, food and beverage cans and bottles cannot be put in transparent or semi-transparent bags.

② Waste collected by voluntary cleaning

Waste generated from voluntary cleaning activities on public roads and other places will be collected without charge. Take such waste out in transparent or semi-transparent bags (up to 45L) by marking "SEISOU GOMI" (waste from cleaning activities) on them.

※Waste such as fallen leaves should be taken out on the yard trimmings collection days.

③ Disposable diapers (except those used for pet animals)

Dirt must be removed. Do not put anything other than paper diapers in a bag. (see page 3)

Exemption system in regard to pay bags (designated collection bags)

Households to which the exemption is applicable

A certain number of designated collection bags will be provided to the households that fall in any of the followings.

- ※ Even if the same household falls in more than one of the followings, the number of bags to be provided will not be increased.
- ◇Public assistance recipient household
- ◇Child rearing allowance recipient household
- ◇Special child rearing allowance recipient household
- ◇Qualified household for medical subsidy to single-parent families, etc.

Delivery of bags will start from late February 2015.

- ※For detailed information on how to receive bags, please refer to a notice sent to corresponding households, public bulletins, etc.
- ※At the time of delivery of pay bags (designated collection bags), please prepare a bigger bag so that you can carry them back in it.

Contact: Resource Solution Unit (61-3396)

Purchasing pay bags (designated collection bags)

Pay bags (designated collection bags) will be available in a package shown below at supermarkets, convenience stores, drug stores and other shops in the city from mid February 2015.

Package
(front side)

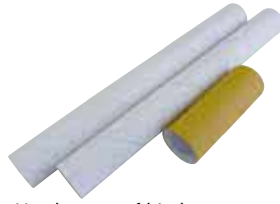

Combustible waste

Raw garbage and sea shells

Soiled paper (tissue, cooking paper, etc.)

Hard cores of kitchen wraps and rolls of bathroom tissue

Aluminum foil

Wood products (Japanese needle boxes, disposable chopsticks, wooden skewers, etc.)

Products for pet animals (pet sheets, toilet sand for pets)

Oil stained boxes of pizza

Goods made of rubber or vinyl

Pocket heaters

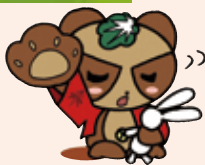

Refrigerants

Items with a size approximately over 50cm in length, width or height that cannot be put in a pay bag (designated collection bag) are classified as Large Items (there are some exceptions). Items listed above are some examples.

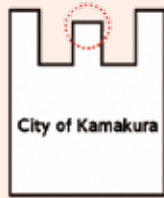

Basic instructions

Put waste in a pay bag (designated collection bag).

Securely tie off the top so that whole waste is surely kept inside the bag.

①Tie off

②Tie off

③Completed

Completed

※The bag shown is just an example.

Any waste put in bags other than pay bag (designated collection bag) will not be accepted.

Disposable diapers will be collected without charge (except those used for pet animals)

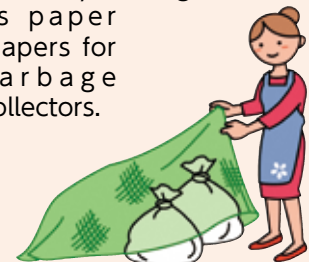

①Dirt must be flushed away in a toilet.

②Put waste in a **transparent or semi-transparent bag (up to 45L)** and tie off the top so that whole waste is surely kept inside the bag.

③Take the waste out on the collection day of combustible waste by making it identifiable as paper diapers for garbage collectors.

※If any item other than paper diaper is put in a bag, it will not be collected.

Shoes, boots, sneakers

Leather products

Bath mats, bathroom mats, carpets
(that can be put in a pay bag (designated collection bag))

Pillows, cushions, stuffed toys
(that can be put in a pay bag (designated collection bag))

Hygiene products
(bandages, sanitary items)

Cigarette lighters
(should be emptied)

Plastic products
(except plastic containers and packaging and manufactured plastic goods)

Instructions for items with a size approximately over 50cm in length, width or height that can be taken out as combustible waste

- Bath tub cover (accordion type), reed screens, bar-shaped items excluding metal part (walking sticks, bats, brooms, mops, rackets, etc.)
- Wrap bar-shaped waste with a pay bag (designated collection bag) or tie it with other bag large enough for this purpose.
- When there are several items to dispose of, they can be wrapped or tied together.
(However, combustible waste and non-combustible waste must be bundled and taken out separately.)

Wrap the waste with a bag and affix with tape.

Bath tub cover (accordion type) ▶ 20L bag

Tie them together

Note! Waste cannot be accepted if:

- a waste item is not completely wrapped,
- a waste item sticks out of the bag,
- a waste item that must be taken out on different collection day is also put together, or
- a pay bag (designated collection bag) is cut and used for this purpose.

Wrap the waste completely with a bag.

- Cushions, pillows, sponge mats or similar items

- Put it in a pay bag (designated collection bag) as a basic procedure.
- Fold flexible items before putting in a bag. Tie off the top of the bag.
- ※ Items that cannot be put in a 40L bag are classified as Large Items.

- Bath tub covers (board type)

- Affix a pay bag (designated collection bag) of 40L on it.
- ※ When there are several items to dispose of, tie them together with a string.

- Tricycles

- Place it in a pay bag (designated collection bag) as far as possible and firmly affix the bag on the waste with tape, etc.

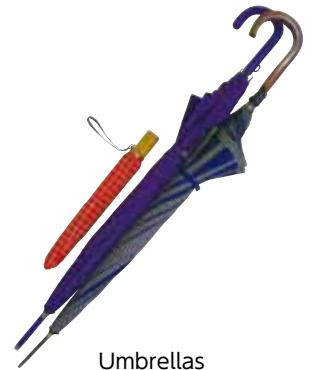

Non-combustible waste

Glassware

Metal ware

Umbrellas

Items that cannot be put in a pay bag (designated collection bag) or with a size over 50cm in length, width or height are classified as Large Items (there are some exceptions).

Basic instructions

Put it in a pay bag (designated collection bag).

Securely tie off the top so that whole waste is surely kept inside the bag.

①Tie off

②Tie off

③Completed

Any waste put in bags other than pay bag (designated collection bag) will not be accepted.

※The bag shown is just an example.

Items that cannot be put in a 40L bag (with a size approximately less than 50cm in length, width and height)

Affix a pay bag (designated collection bag) of 40L on the waste.

Option①: Affix one 40L bag

Option②: Affix two 20L bags

Including fan heaters and microwaves.

Note!

If an item is affixed with a smaller sized bag, it cannot be accepted.
Example: when affixed with a 20L bag

▶Make sure to affix the bag in prescribed size (40L).

※The bag shown is just an example.

Same collection day as toxic/hazardous waste and used cooking oil

Small household appliances

Cans and bottles of paint, cosmetics, etc.
(Cans and bottles that contained something other than food and beverage. They should be emptied before taken out.)

Bottle caps and metal lids

Instruction for items with a size approximately over 50 cm in length, width or height that can be accepted as non-combustible waste

- Bar-shaped metal items
Umbrellas, inflators, ski poles, bats, walking sticks, mops, brooms, rackets, etc.
- Wrap bar-shaped waste with a pay bag (designated collection bag) or tie it with other bag large enough for this purpose.
- When there are several items to dispose of, they can be wrapped or tied together.
(However, combustible waste and non-combustible waste must be bundled and taken out separately.)

Tie the waste using a bag.

Wrap the wastes with a bag and affix with tape.

- Ceramics (tableware), frying pans
Put it in a pay bag (designated collection bag) as a basic procedure.
※ Items that cannot be put in a 40L bag are classified as Large Items.

- Tricycles (made of metal)
Place it in a pay bag (designated collection bag) as far as possible and firmly affix the bag on the waste with tape, etc.

※ The bag shown is just an example.

- Golf clubs (up to 3 pieces)
Wrap or tie the waste with a pay bag (designated collection bag).
(More than 3 pieces are classified as Large Items.)

Note! Waste cannot be accepted if:

- waste items are sticking out of the bag

Tie them together with a bag.

- waste items is not completely wrapped

Wrap the waste completely with a bag.

- a waste item that must be taken out on different collection day is also put together

(Example) A broom made of wood and an umbrella

Sort them properly and take them out on the fixed days separately.

Plastic containers and packaging

What are plastic containers and packaging materials?

They are the items to be sorted based on the Containers and Packaging Recycling Law which are plastic used for wrapping or packaging things and are no longer used after the good contained was used (or consumed) or taken out.

They have this mark on them.

Plastic bags from stores, polyethylene bags, films

Cups, packages

Plastic bottles (except those having a PET bottle mark on them)

Tubes

Others (plastic net bags for fruits or vegetables, lids and caps of bottles and tubes)

Trays, styrene foams

Note! Following items are not classified as plastic containers and packaging materials

Items that have a PET bottle mark on them
⇒ Caps and labels are classified as plastic containers and packaging materials but the bottle itself is classified as PET bottle.

Plastic products made of composite material (except manufactured plastic goods), toys, stationeries, CDs, video tapes, etc.
⇒ Combustible waste

Items that are not goods but used as a bag of containers or wrapping materials, laundry bags, envelopes of direct mail, etc.
⇒ Combustible waste

Instructions

① Empty a container.

Sticky label of price, etc. that is hard to peel off the container may be left on.

② Wipe out or rinse the inside.

Remaining food or soils should be wiped off or rinsed away with water.

③ Place them in a transparent or semi-transparent bag (up to 45L).

Double bags are prohibited.

Do not put a bag of waste in another bag.

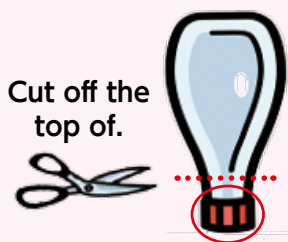

How to wipe off the inside of containers?

For tubes of mayonnaise, ketchup, etc.

▶ Removing solid stuff remaining on the inside is enough.

① Cut off the top of a tube.

② The top with sticky soils should be taken out as combustible waste.

Put the tube upside down for easy use of remaining content that comes down.

Put some water in the tube and shake it to clean the inside.

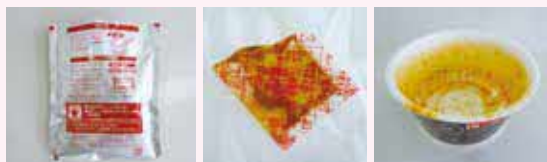

For bottles of shampoo, cleaner and oil

There is no need to clean the inside.
※They should be emptied.

For containers with greasy dirt or strong smell (package or container of curry, small bags of noodle soup or other sauces, etc.)

Containers with greasy dirt or strong smell such as retort-packaging or container of curry and pickles containers should be taken out as combustible waste.

They need not to be washed using lots of water or cleaner. Water is also valuable resource.

If containers stained or contaminated with a lot of dirt or foreign materials, the city may be charged with a disposal cost in full amount.

Plastic containers and packaging materials collected by the city will be sorted, compressed and packaged to be recycled as ammonia or others through the Japan Containers And Packaging Recycling Association (a public utility foundation). Most of the costs required for recycling are borne by recycling companies. Quality inspection of plastic containers and packaging materials is conducted every year by the Japan Containers And Packaging Recycling Association. Collected waste may be rejected as a result of inspection if a lot of soils or foreign materials (cigarette lighters, etc.) are remained. In that case, the city will have to bear the cost of disposal of the rejected waste in full amount.

Compressed and packaged plastic containers and packaging materials are selected at random for quality inspection.

Foreign materials including paper, a cigarette lighter and chips of wood were found.

Plastic goods

What are Plastic goods?

They are goods made of plastic except plastic containers and packaging materials which are manufactured using a single material of either polypropylene (PP) or polyethylene (PE).

How to differentiate them?

They must be marked as

① polypropylene/ **PP**

or

② polyethylene/ **PE**

Check the bottom or back of products.

Main 18 items

Kitchenware

① Bowls

② Colanders

③ Sealed containers

④ Sink trash bag

⑤ Dish drainer basket and tray

Items with a size approximately over 50 cm in length, width or height are classified as Large Items.

Instructions

① Wash soils away.

Wash away sand and mud on plant pots and planters.

Stickers should be peeled off if possible.

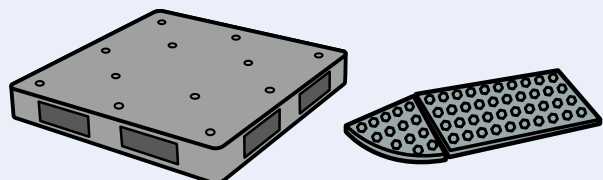

② Leave a large sized item out as it is. Place small items in a transparent or semi-transparent bag (up to 45L).

※Deteriorated or broken items can be taken out as manufactured plastic goods unless they are soiled.
 ※If you don't know the material of a good, take it out as combustible waste.

What products will be made after recycling?

They will turn into manufactured plastic goods once again.
 (Including pallets for forklift and slopes to eliminate difference in level)

Bathroom goods

Gardening goods

Baskets

Cleaning equipment

Office supplies

Note! Items that cannot be accepted as Plastic goods

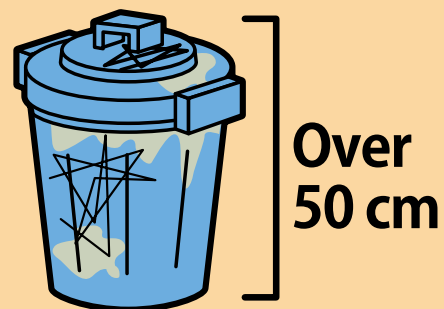

① Items having a plastic mark on them

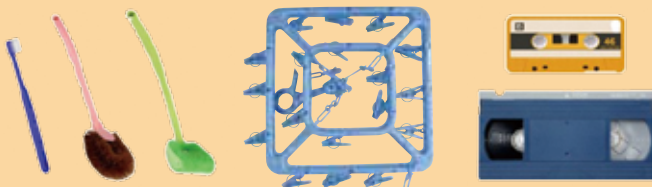

Those that also have a plastic mark on them should be taken out as "Plastic containers and packaging materials."

※If you don't know the material of a good, take it out as combustible waste.

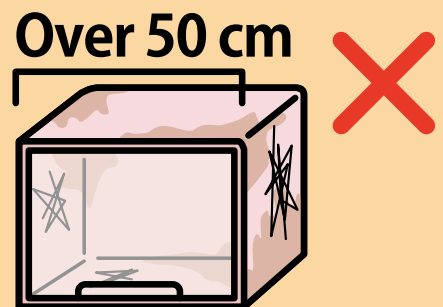

④ Items with a size over 50 cm in length, width or height (classified as Large Items)

② Items that include metal or rubber part

Toothbrushes, video tapes, ballpoint pens, toys, etc.
▶ Take them out as combustible waste.

Example: Plastic buckets, wardrobe cases, etc.

③ Construction materials
(Corrugated plate, polyvinyl chloride pipes, vinyl sheets)

Mixed paper

Instructions

Option ①

Put them in a paper bag and close the top of the bag using tape or staples.

(Paper bags which are not white on the inside can also be used.)

Feel free to use the "Reuse Box" located in the city hall and branch offices from which you can take paper bags when you need it among those bags donated by people who no longer use them.

Option ②

Wrap them up in wrapping paper or calendar pages and secure them using tape or staples.

Note!

- Do not put other materials such as metals together because it may cause a failure of machines.

(Small non-paper parts including cellophane in envelopes with windows, metal fixings such as staples, tape and stickers can be left on.)

Sheets of paper with ink or pigments (paint, crayon or sumi) can also be accepted.

Note!

Different types of bag disposal between mixed paper and paperboard

▶ The way of closing the top of the bag is different.

Mixed paper

Close the top of the bag using gummed tape or staples.

↓
This type of bag will be recycled without opening for a reason of protection of personal information.

Paperboard

Tie the top of the bag containing paperboard with twine.

↓
This type of bag will be opened and sorted out manually after collected.

Since we identify one from the other during collection according to how the bags are secured, your cooperation would be much appreciated.

Paper (Newspapers) (magazines, used books, paperboard, craft paper)

Once a week

Newspapers (including ad inserts)

Newspapers and ad inserts

Instruction: Tie them up with twine.

Magazines, used books

Magazines, used books, catalogs with spine

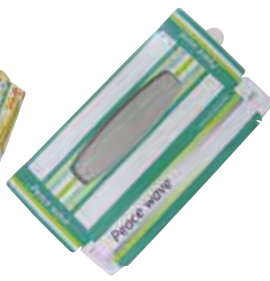

Instruction: Tie them up with twine.

Paperboard, craft paper

Boxes of sweets, etc.

Tissue boxes

Craft paper (brown wrapping paper, etc.)

Please remove any non-paper parts such as vinyl film or metal cutting edges.

Vinyl lip on tissue boxes

Metal cutting edges on kitchen wrap boxes

※Paperboard is mainly used for tissue and other boxes which is grey on the inside.

Instructions

Method ①

Put them in a paper bag and tie the top of the bag with twine.

Method ②

Tie them up with twine.

Method ③

Insert them in magazines or used books.

Feel free to use the "Reuse Box" located in the city hall and branch offices from which you can take paper bags when you need it among those bags donated by people who no longer use them.

Following items are **combustible waste** ! ※They are not suitable to be melted for recycling.

Soiled paper, paper cups with sticky dirt or strong smell

Egg and fruit trays made of paper pulp

Hard cores of kitchen wraps and rolls of bathroom tissue

Oil stained boxes of home-delivered pizza

Paperboards and cardboards coated in a color of gold, silver or with vinyl

Paper (paper cartons) (cardboard) recycling box spots

Paper cartons

Milk, liquor and juice cartons

We also accept cartons that are silver or brown on the inside.

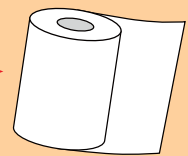

Instructions

- ① Please rinse the inside.
- ② Cut the cartons open.
- ③ Dry them off.
- ④ Bundle them with twine or rubber bands.

Do not place these items in combustible waste!

Paper cartons can be recycled to produce toilet tissue rolls and your cooperation is much appreciated.

Cardboard (corrugated board)

Cardboard

You can identify it by the cross section.

Instructions

Collapse cardboard boxes and tie them up with twine.

Tied up cardboards.

Paper recycling box spots

Paper including newspapers, magazines and used books, paperboard and cardboard (excluding mixed paper and paper cartons) can also be brought to the recycling box spots located at seven places within the city on days other than the fixed collection days.

Magazines, used books, paperboard, craft paper

Newspapers

Cardboard

Location of spots	Open hours
Main city hall of Kamakura	6:00 ~ 21:00
Imaizumi branch (fire station)	
Ofuna administration center	8:00 ~ 21:00 Last Monday of each month: 8:00 ~ 17:00
Koshigoe administration center	
Fukasawa administration center	
Tamanawa administration center	
Kamakura Youth Center	Tuesday to Saturday: 8:30~21:00 Sunday, Monday and holidays: 8:30~17:00

※For large amount of paper waste generated from moving or big cleanups, see page 19.

※These recycling box spots may not be available on the days when the city office is closed (year-end and new-year holidays, etc.).

Fabrics

Place in transparent or semi-transparent bags up to 45L

Once a week

Clothing (shirts, sweater, undergarments, socks, stockings, etc.)

Please leave buttons and zippers on clothing since they will be recycled as secondhand clothes.

Towels

Blankets, Bedding, Window drapes

Yarn

Scrap cloth

Cloth with holes can also be accepted and recycled as work gloves or rags.

Instructions

① Please wash and dry before disposing.

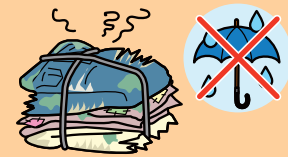

② Place them in transparent or semi-transparent bags and tie off the top.

Please do not put fabrics out when it is raining.

Wet items will mold, and cannot be recycled.

Following items are classified as **combustible waste!** (Take them out in pay bags (designated collection bags).)

Items with cotton batting

Cushions, pillows

Slippers

Quilts

Feather items

Down coats, etc.

Items with vinyl part

Raincoats, etc.

Leather items

Leather gloves, etc.

Yard trimmings

Place in transparent or semi-transparent bags up to 45L or tie up with twine

Once a week

Pruned tree branches

Leaves, grass, raked leaves

Cut flowers

Bamboo (stalks and leaves)

Palm fronds

Instructions

When you place it out at the clean station

① Bundle them together

Keep trimmings in same length and bundle them together (under 50 cm long and 15 cm thick).

② Put them in bags

Place a certain amount of grass or raked leaves in transparent or semi-transparent bags (up to 45 L) and tie off the top of the bags.
※Wait until just before collection to bag the waste. This will prevent molding.

How much output is allowed to place at the clean station at a time?

A total of 5 bundles or bags is allowed for one household's output.
Example: 3 bundles + 2 bags = 5

When you drop off yourself at the facility (with a charge)

● Instructions

Keep pruned branches and stalks under 1.5 m long and 60 cm thick and drop it off yourself.

● Place for drop-offs (see the Back cover).

Yard Trimmings Compost Facility
(1493-2, Sekiya, Tel: 45-0526)

◆ Operation hours

Monday to Friday:
8:30 ~ 11:30, 13:00 ~ 16:30
Saturday: 8:30 ~ 11:30

● Handling fee (cash only)

- 100 yen/time for 100 kg or less
- Additional fee will be charged in increments of 40 yen per 10 kg exceeding 100 kg.

Example: 180 yen will be charged for 120 kg.

Note!

- Please do not put together other items such as rocks, paper waste, gardening products, etc..

- If your yard work was handled by a professional, please ask them to take care of the waste generated.

- Processed goods such as wooden products, veneer boards and bamboo ware which are less than 50 cm long qualify as "Combustible Waste." Processed goods which are 50 cm long or over are qualify as Large Items.

- Trimmings of trees such as Apocynaceae that are highly toxic qualify as "Combustible Waste."

PET bottles

Place in transparent or semi-transparent bags up to 45L

Once a week

They are beverage, liquor, soy sauce PET bottles having a mark  on them.

Item classified as **combustible waste**

Colored PET bottles (such as imported overseas products) cannot be recycled.

Check the mark with care

Items that have this mark on them qualify as plastic containers and packaging. Do not take them out as PET bottle.

Instructions

① Remove the caps and labels.

② Rinse the inside.

③ Place them in transparent or semi-transparent bags and tie off the top of the bag.

Caps and labels qualify as plastic containers and packaging.

Flatten PET bottles, if possible.

Compost produced from yard trimmings is distributed.

Facility	Address	Phone
① Yard Trimmings Compost Facility	1493-2 Sekiya	45-0526

[Place and hours of compost distribution]

① Yard Trimmings Compost Facility
Monday to Friday: 8:30 ~ 11:30, 13:00 ~ 16:30
Saturday: 8:30 ~ 11:30

②~⑦
Monday to Friday: 8:30 ~ 17:00
(excluding holidays)

※ It is not currently distributed at Nagoe Clean Center as the facility is under refurbishment work (as of February 2015).

- Compost is distributed to residents in Kamakura City only.
- You can take compost at a time up to 3 bags of 45 L that can be carried by one vehicle (including cars and motorbikes).
- Use the compost by mixing with three to four times soil.

Food and beverage cans and bottles

Place at the clean station as it is

Once a week

Food and beverage cans (aluminum and steel cans)

Beverage cans

Food cans

Cookie and sweets tins Laver cans Tea leaves cans Pet food cans

Lids of cans can also be accepted.

Food and beverage bottles (glass)

Bottles of alcoholic beverages

Seasoning bottles Bottles of medicines and health drinks

Sort out the caps and lids

Plastic stoppers and lids

Plastic containers and packaging (see pages 7 and 8)

Metal caps

Non-combustible waste (see pages 5 and 6)

*If an inset stopper or lid cannot be removed, the bottle can still be put in recycling.

Note! These items qualify as combustible waste.

Paint cans

Cosmetic bottles

18-liter square cans

Cans and bottles that contained food or beverage only qualify as food and beverage cans and bottles.

Special requests

Please return reusable bottles such as beer and large liquor bottles to their place of purchase whenever possible.

Instructions

① Empty the bottles/cans.

② Wipe off or wash the inside.

Dirt should be wiped off or washed away with water.

③ Place in the container at the clean station.

Place cans in the Yellow container.

Place bottles in the Blue container.

Please take the cans and bottles out of bags and place directly in the container.

How to dispose cans and bottles that contained oil

They should be free of oil/grease. (You don't have to wash it with water, etc..)

Hazardous/Toxic waste

Place in transparent or semi-transparent bags up to 45 L

Once a month

Same collection day as non-combustible waste and used cooking oil

Instructions

Items ① through ⑤ should be sorted by item type.

① Fluorescent tubes

Place them in their original boxes, or wrap up with paper and mark "KEIKOKAN" (fluorescent tubes) on them.

② Dry batteries and ③ Thermometers, clinical thermometers

Place ② and ③ separately in transparent or semi-transparent bags.

④ Aerosol spray cans, small gas cartridges, etc.

They should be emptied and placed in transparent or semi-transparent bags.

⑤ Broken glassware/ceramics/mirrors, knives, bulbs, etc.

Wrap it in paper, etc. and mark "KIKEN" (hazardous) on them.

Used cooking oil

Put in PET bottles

Once a month

Same collection day as non-combustible waste and toxic/hazardous waste

Vegetable oil including salad oil, corn oil, rapeseed oil and olive oil

Note! Following oil is not accepted!

- Animal oil such as lard oil
- Mineral oil such as engine oil

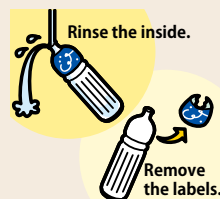

Instructions

① Remove remaining frying batter and leave the oil until it is cooled.

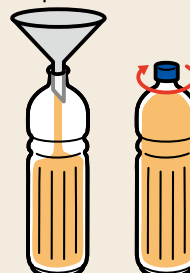

② Prepare empty PET bottles. Rinse the inside and remove their labels.

Use 500 ml PET bottles, if possible.

③ Put the cooled oil into the PET bottles and put on the caps.

④ Mark "SHOKUYO ABURA" (Cooking oil) on the PET bottles using a marker. (Do not place them in bags.)

- ※ Make sure to mark on the bottles. If not, they may be misidentified as tea bottles and may not be collected.
- ※ Take care when taking them out so that they will not turn over and be separated from other waste.

Request for pick-up or drop-offs (with a charge)

Instructions for Large Items and Bulky Large Items

●Large Items (600 yen/item)

Items with a size approximately over 50 cm in length, width or height, including furniture such as chests, bookshelves, tables, desks and chairs, bedding such as futons*, and mattresses (excluding spring mattresses), bicycles, electric appliances, carpets*, etc.

※Some items in a size that can be put in a plastic bag up to 45L with the top tied off may be taken out as combustible waste.
Example: Light futons, entrance hall mats, carpets, etc.

●Bulky Large Items (1,200 yen/item)

Large items with a size approximately over 1 m in length, width or height, including following 8 items:

- ①Furniture such as chests and shelves (There are some exceptions. Please contact the Waste Treatment Center in your district for details.)
- ②Beds, sofa beds (excluding spring mattresses)
- ③Drawing room lounge chair (for two or more)
- ④Tables (with a top area of over 1.2 square meter)
- ⑤Desks, drawing tables
- ⑥Organs, electric organs
- ⑦Steel stands or racks that are broke down and occupy an area of 1.65 square meters or over and less than 3.3 square meters.
- ⑧Health appliances such as massaging chairs

①Procedure to request the city for pick-up

①Make reservation at the Waste Treatment Center in your district on the phone.

Following information will be confirmed:

- ①your address, ②your name,
- ③your phone number, ④item and size,
- ⑤ number of items (up to 5 at a time),
- ⑥place to which you put the waste out,
- ⑦pick-up date and ⑧handling charge.

※ Pick-up on the day of reservation is not possible and you cannot designate the pick-up date, as a rule.

Please check the item you want to dispose and call the "Clean Center."

②Purchase Large Item Stickers.

※Two types of sticker are available at 600 yen or 1,200 yen, depending on the type and the size of item.

- ※ Make sure to have the stickers affixed with payment receipt stamp on them.
- ※ Any charge paid cannot be returned and stickers will not be reissued. Please be sure to make reservation for pick-up at the Clean Center and confirm the amount of charge before purchasing them.

[Large Item Stickers available at:]
Post offices in the city, administration centers, convenience stores*, Welfare Shop in the Kamakura City Office (4th floor of the city hall)
*Excluding some stores

③ Write your name on the large item sticker and affix the sticker on the large item and then bring it to the designated place.

※ The place will be outdoors in principle.

※ Any large item will not be collected if the sticker does not have a receipt stamp or the paid amount of charge is insufficient.

- Please bring the item to the place by 8:30 in the morning on the pick-up day.
- You don't have to be present at the pick-up time in the case of large items or bulky large items only.

Nagoe Clean Center Phone: 24-1097, Imaizumi Clean Center Phone: 44-5344

Reception hours: Monday to Friday (including holidays) 8:15 ~ 17:00 (See the back cover page for the Clean Center in your district.)

②Drop-off procedure

Bring the large items to Nagoe Clean Center or Imaizumi Clean Center.

[Drop-off days and hours:]

Monday to Friday (including holidays) : 8:30 ~ 11:30 13:00 ~ 16:00
Saturday (including holidays) : 8:30 ~ 11:30

[Handling charge (cash only)]

●For large item : 300 yen/item
●For bulky large item : 600 yen/item

Instructions for special waste (waste generated from moving or big cleanups)

Large amount of recyclable waste or garbage generated from moving or big cleanups (more than 5 plastic bags of 45L) cannot be taken out at a clean station. You have to request the relevant Clean Center for pick-up or drop them off at the Clean Center for yourself.

※ In the case of pick-up or drop off, you are also required to properly sort out recyclable items and garbage.

※ When you requested for pick-up, you have to be present at the time of pick-up.

[Request for pick-up]

●Handling charge: 4,200 yen/1 cubic meter

[Drop-off]

●Handling charge:

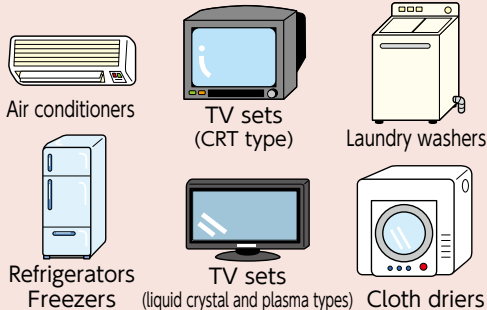

For items not exceeding 100 kg, it costs 500 yen per drop-off.
For items exceeding 100 kg, 200 yen is added for every additional 10 kg.

Example: 700 yen will be charged for 110 kg

Recyclable Items and Waste Not Handled by the City

Specified household appliances (air conditioners, TV sets, refrigerators, laundry washers, cloth driers)

Air conditioners (both window and split-system units), TV sets (CRT, liquid crystal and plasma types), refrigerators, freezers, laundry washers and cloth driers which were manufactured and sold for household use cannot be collected by the City. Please dispose them following either of the methods described below.

These items are subject to the Home Appliance Recycling Law

※Contact:
Electric appliance recycle card center,
Association for Electric Home Appliances
Phone: 0210-31-9640
HP: <http://www.rkc.aeha.or.jp/>

Methods of disposal of household appliances no longer used (with a charge)

- Method 1 Ask the store you purchased the household appliance to dispose it.
Method 2 When you replace the appliance with new one, ask the store from which you purchase new product for disposal of the old one.
Method 3 Ask a recycling company who can accept the electric appliance recycle cards to pick up and transport the item (contact the city office for information of those companies).
Method 4 Bring the appliance to the designated waste receiving location yourself. Please be sure to first purchase electric appliance recycle cards from a post office or Japan Post Bank and then contact the designated waste receiving location before you bring it to the place.

Designated waste receiving locations in neighboring area (in alphabetical order)

Name	Address and Phone No.
Satou Co., Ltd., Recycling Department	730-3 Hagisono, Chigasaki-shi 0467-84-6785
Seino Transportation Co., Ltd, Chigasaki Branch	2730 Hagisono, Chigasaki-shi 0467-87-1305
Nippon Express Co., Ltd, Yokohama Minami Branch	1226, Hirado-cho, Totsuka-ku, Yokohama-shi 045-828-3812

Personal computers (desktop CPUs, laptops, CRT displays, LCD displays)

- Contact the manufacturer of your PC and make a request for disposal. Contact information is available on the web sites of each PC manufacturer or the PC3R Promotion Association.

※Contact : PC3R Promotion Association
Phone: 03-5282-7685 HP: <http://www.pc3r.jp>

- Check for existence of PC recycling mark. PCs that do not have this PC recycling mark on them will be handled at a charge. The amount of charge differs depending on the manufacturer.

Waste Not Handled by the City (Ask a waste treatment company. If you cannot find such company, contact the city office.)

Category	Items
Toxic Waste	Farm chemicals (including containers), Lab chemicals (including containers), Liquid waste (including containers), e.g. engine oil, battery acid (including battery itself), petroleum, kerosene, etc. Small secondary batteries (NiCad batteries, lithium ion batteries, etc.), Button-type batteries, Tires
Foul-Smelling Waste	Dirt
Hazardous Waste	Propane tanks, fire extinguishers (filled)
Infectious Waste	Medical waste with sharp edges
Extremely Oversized or Heavy Waste	Automobiles, watercrafts, pianos, tire wheels, motorbikes/motorcycles, electrically assisted bicycles, electric 3- and 4-wheeled vehicles, Farm machinery (threshers, etc.), fireproof safes, bathtubs (excluding wooden tubs), Water heaters (electric/solar-powered), Refrigerators, freezers for business use, Oil storages (over 90L), Metal drums (over 200L), Various surfboards (surfing, windsurfing, bodyboarding)
Soil & Stones	Concrete, dirt, sand, rocks, bricks, blocks, tiles, and similar substances
Other	Electric refrigerators (refrigerators, wine cellars, refrigerator-freezers), electric laundry washers, cloth driers, TVs (including LCD type), air conditioners (both window and split-system units), personal computers (desktop CPUs, monitors, all-in-one desktops, laptops, including standard accessories provided with it such as keyboards, etc. of over 1 kg), Spring mattresses (including sofa beds), Bowling balls

Instructions for small secondary batteries and button-type batteries

Used small secondary batteries and button-type batteries are not collected by the city. Please place them in collection boxes located at the stores of those types of batteries. (Make sure to affix the batteries with scotch tape for insulation purpose before putting them in a collection box. For batteries that cannot be accepted by stores, contact the Resource Solution Unit of the City.)

For understanding the collection day once a month correctly

1st day of the week means "a day of the week that comes first time in that month, not a day of the 1st week in that month. The same applies to a 2nd, 3rd and 4th day of the week.

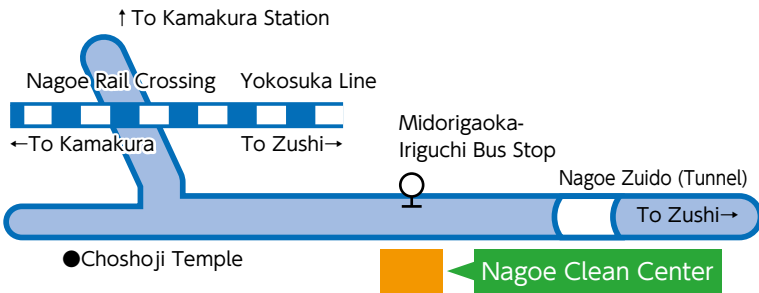

Examples shown in the calendar on the right.

- "1st Friday" means the 1st day (Friday).
- "4th Tuesday" means the 26th day (Tuesday).
Note that it is not the 19th day (Tuesday).
- ※ Any 5th day of the week in each month will not be a collection day.

Sun	Mon	Tues	Wed	Thurs	Fri	Sat
					①	2
					← 1st
